

Resource

```
classDiagram
    class Resource {
    }
    class main_twofactor["main.twofactor"] {
        +get()
    }
    main_twofactor --|> Resource
```

The diagram shows a class hierarchy. At the top is a class box labeled 'Resource'. It has three horizontal compartments: the top one contains the text 'Resource', and the other two are empty. Below it is a class box labeled 'main.twofactor'. It also has three horizontal compartments: the top one contains 'main.twofactor', the middle one is empty, and the bottom one contains '+ get()'. A blue arrow with an open triangular head points from the 'main.twofactor' box up to the 'Resource' box, indicating that 'main.twofactor' inherits from 'Resource'.

main.twofactor

+ get()
